PREREGISTRATION SECTION

- (1) Prior to analyzing the complete data set, a time-stamped preregistration was posted in an independent, institutional registry for the data analysis plan. **Not answered**
- (2) The manuscript includes a URL to all preregistrations that concern the present study. **Not answered**

Comments about your Preregistration

No comments.

METHODS SECTION

The manuscript fully describes...

(14) the rationale for the sample size used (e.g., an a priori power analysis).

Not answered

Comments about your Methods section

No comments.

RESULTS AND DISCUSSION SECTION

The manuscript...

- (26) presents all statistical analyses that were conducted, including any interim statistical analyses **Not answered**
- (27) distinguishes sharply between “confirmatory” (i.e., prespecified) and “exploratory” (i.e., not prespecified) analyses. **Not answered**
- (28) justifies all statistical choices (e.g., including or excluding covariates; applying or not applying transformations; use of multi-level models vs. ANOVA). **Not answered**
- (29) reports the sample size for each cell of the design. **Not answered**
- (30) reports how incomplete or missing data were handled. **Not answered**
- (31) presents protocols for data preprocessing (e.g., cleaning, discarding of cases and items, normalizing, smoothing, artifact correction). **Not answered**

Comments about your Results and Discussion

No comments.

DATA, CODE, AND MATERIALS AVAILABILITY SECTION

The following have been made publicly available...

- | | |
|--|---------------------|
| (32) the (processed) data, on which the analyses of the manuscript were based. | Not answered |
| (33) all code and software (that is not copyright protected). | Not answered |
| (34) all instructions, stimuli, and test materials (that are not copyright protected). | Not answered |
| (35) Are the data properly archived (i.e., would a graduate student with relevant background knowledge be able to identify each variable and reproduce the analysis)? | Not answered |
| (36) The manuscript includes a statement concerning the availability and location of all research items, including data, materials, and code relevant to your study (such as the TOP statement by Aalbersberg et al., 2018; https://osf.io/sm78t/). | Not answered |

Comments about your Data, Code, and Materials

No comments.
